[salute]

From <http://www.mspy.com> currently has errors and downloads take forever will post my own links and samples soon.

Sorry for the bad format it was a .bson file converted to .json for some what readable form, just control F this bitch for passwords all accounts work through tor! Happy hunting 😊

Apple Id accounts you can use tor to login perfectly safe! Good method so far use "Find My phone" Wipe data and set a message that they been hacked and the only way to get their data back is to pay a ransom.
